A light collection of symbolic creations inspired by Geometry. Light is treated as matter taking an archetypal form, yet it preserves its subtle character. Mariza’s philosophy lies in the everlasting effort to introduce in everyday objects magic, renegotiating the relation between light and spiritual light. The luminaires are build to order and handcrafted in Greece.

It is in observing, that the shapes reveal their mysticism and elevate out spirit. Her slow process of constructing each and every luminairy encompasses all inner energy that flows freely through hands to the objects and breathes life into her unique creations.
